When a dispute occurs on an athlete's first delivery in any frame, or on the second delivery in the tenth frame after a strike on the first delivery

a) If the dispute is over whether the athlete fouled, the athlete shall complete the frame and then bowl one provisional ball at a full setup of pins

c) If the dispute is over whether a dead ball should have been declared, the athlete shall complete the frame and then bowl a complete provisional frame.

When a dispute occurs on a spare attempt, or on the third delivery in the tenth frame, no provisional ball is necessary unless the dispute is over whether a dead ball should have been declared. In that case a provisional ball shall be bowled at the same setup, which was standing when the disputed ball was bowled.

Altering the surface of the bowling ball during a game is not allowed.

Bowling Ball Procedure

- Only bowling balls manufactured on or after January 1, 1991 that are on the USBC approved ball list latest the day the tournament starts are allowed for use in IBF sanctioned competition.
- The online list may be found at:
<https://bowl.com/approved-ball-list>
and will be available during all world events.
- Acceptance of manufactured balls prior to the inception of the USBC ball list for use in competition shall not be allowed.

Additional Regulation – Urethane Bowling Balls

- Effective immediately, only urethane bowling balls that are manufactured with a **minimum hardness of 78D** and are approved by USBC for use are permitted in IBF events, including World Championships and World Cups.
- Random hardness checks may be carried out during events.
- Any urethane bowling ball that measures below **72D** during inspection will be declared non-compliant and removed from the competition.
- A full list of bowling balls that **are not eligible** for use in IBF events is available at:
 - <https://bowl.com/equipment-specifications/athletes>
 - Then select - **National Tournament Ineligible Ball List - 78D Slow Oil Allowed**
 - This will provide the current list of ineligible balls.

Urethane bowling balls that were previously approved and measure below 78D, but remain on the USBC approved ball list, may still be used in tournaments that choose to allow them. However, they are not permitted in IBF events under this regulation.

- Cleaning of the surface of the bowling ball is permissible prior to any delivery during a game. Any dry cloth product that is non-abrasive and contains no chemicals would be acceptable to use. Cleaners, which are products meant to clean the ball surface without changing the surface roughness, may be used only between block of games, and provided they are on the list of approved products. If the ball picks up a foreign substance that cannot be removed by rubbing, an approved liquid cleaner such as rubbing alcohol may be used. However, this action requires approval from the Tournament Technical Committee.
- Adjusting of the surface of the bowling ball by means of scrub sponges, scouring pads, and polish that are on the list of approved products may be done only during any practice session and between any block of games, as well as between semifinals and finals of an event, provided it is done outside of the athletes' area.

- Altering the surface of the bowling ball by means of bonded or coated abrasives may only be done in a designated area and only during any practice session, and between any block of games, as well as between semi-finals and finals of an event.
- The list of approved as well as not acceptable products for cleaning and adjusting of the surface of bowling balls can be found on the website www.bowl.com.
